

About Our Doctor

Louis Probst, M.D.

Dr. Probst is one of the most experienced surgeons in the world, having performed more than 50,000 LASIK procedures! In 1995, Dr. Probst began performing LASIK in Canada. He has since performed LASIK procedures using the best excimer lasers in the world, including the Bausch and Lomb Technolas 217, Nidek EC 5000, LaserSight LSX, Autonomous "flying spot" Ladar Vision, and the VISX Star S3 Smoothscan excimer lasers. Over 200 eye doctors have had their LASIK procedure performed by Dr. Probst.

Education/Training

Dr. Louis Probst completed his ophthalmology residency at the University of Western Ontario where he received four awards from his peers for outstanding achievement. He was selected among ophthalmologists across North America for a surgical fellowship in corneal transplantation and refractive surgery at the University of Minnesota.

Memberships/Affiliations

Currently, Dr. Probst is a member of the American Academy of Ophthalmology, American Society of Cataract and Refractive Surgery, and the Educational Director of the International Society of Refractive Surgery.

Honors/Accomplishments

Dr. Probst has given over 200 lectures and provides training to surgeons and eye doctors at refractive conferences throughout the world from Brazil to India. He has published over 40 articles in peer-reviewed journals, 50 book chapters and 4 textbooks on refractive surgery. As a leader in LASIK, he developed ten instruments specifically for refractive surgeons who perform LASIK procedures. Recently Dr. Probst was the first surgeon in Ontario to implant the new Implantable Contact Lens (ICL), designed to correct the vision of people with extremely high prescriptions and who may not have enough corneal thickness for laser vision correction.
