Jonathan J. Stein, M.D.
Ophthalmic Surgeon
TLC Connecticut

at a qLance

TRAINING:

Dr. Stein received his B.S. from Cornell University and his M.D. from New York University School of Medicine. He completed his Ophthalmology residency at a combined program in the New York University Medical Center and the Manhattan Eye, Ear and Throat Hospital. He completed his Cornea and Refractive Surgery fellowship at the Manhattan Eye, Ear and Throat Hospital. He is Board Certified in Ophthalmology.

LASIK EXPERIENCE:

Dr. Stein completed a specialized year in training devoted to corneal disease and Refractive Surgery. He has cared for thousands of refractive surgery patients and routinely lectures on the topic. He has written multiple scientific papers and continuously edits the literature produced by his colleagues. He has presented his research on refractive surgery in many national and international meetings.

MEMBERSHIPS:

Dr. Stein is an Assistant Clinical Professor at the New York University School of Medicine. He is an Instructor in the NYU Department of Ophthalmology and in the Manhattan Eye, Ear and Throat Hospital. He teaches and trains other clinicians in refractive surgery as well as other ophthalmic surgical techniques. He is a member of several professional societies including the American Academy of Ophthalmology and the American Society for Cataract and Refractive Surgery.

TLC Laser Eye Centers At A Glance

Laser vision correction is one of the fastest growing medical procedures in North America. The provider that people turn to for skilled, experienced and dedicated surgeons is TLC Laser Eye Centers. TLC affiliated surgeons have performed more than 400,000 LASIK procedures and were among the first to perform the procedure in North America. TLC is also committed to helping you achieve and maintain the best vision possible for the rest of your life with the TLC Lifetime Commitment Program. It provides one thing that matters the most when it comes to laser vision correction- peace of mind for a lifetime.

CustomLASIK, which is where a Wavefront analysis creates a unique 3D map of your eye, allows your surgeon to perform a truly personalized procedure. FDA studies have demonstrated that CustomLASIK may produce better vision than is possible with glasses and contact lenses.

When it comes to quality care and results, TLC affiliated surgeons have the experience patients trust.
